

DeSign Tints 3M Haze Sparkle

DESCRIPTION

An economical calandered vinyl film by 3M that provides an alternative to acid etched glass. Used on internal glazed partitions to create design and images, and to provide privacy. This product is suitable for printing.

BENEFITS

- Can be used as a decorative flat glass film or be computer cut to create specific designs, logo and lettering.
- Has the look of sandblasted glass.
- Eliminates the need for sandblasting of glass.
- Strengthen glass.
- Vinyl film has less static to reduce dust.
- Pressure sensitive adhesive.
- Often used in conjunction with company logos on front glass doors.
- Allows the majority of light to be transmitted.
- Ideal for laser cutting and printing.
